20th June, 1949.

Dr. Ricardo Finochietto,
Post Graduate Professor of Surgery,
Hospital Rawson,
BUENOS AIRES.

Dear Dr. Finochietto,

Thank you for your letter of 4th June.

Recently published in England is a book called "Rectum and Colon" written by myself and my son. If you write to Messrs. John Wright & Sons, Publishers, Bristol, England, they would send you one. In that book nearly everything that I know about colonic sutures is explained. I think it will tell you all you want to know. From that you would get improvements which I have made since writing the S.G. & O. article in 1946. We have found the treatment of ulcerative colitis a great success and a lot of cases are cured. The curious thing is that their rectums get better. Page 134 will tell you all about it.

By surface post I am sending you a reprint.

Yours sincerely,

Indert
