Dear Dr. Finochietto:

It was indeed a privilege to meet you at the time of my recent visit to Buenos Aires. I am only sorry that I didn't have an opportunity to see you operate. I enjoyed so much visiting your brother's Clinic and profited a great deal by it.

I was greatly impressed by the number of excellent instruments you have and wonder if it would be possible to get a catalog of these instruments. We have been using your rib spreader for some time, but I didn't know of the large number of other instruments which you have devised.

Thank you again for your kindnesses to me. With kindest regards.

Yours very sincerely,

Alton Ochsner
